Capital Recovery Fees

General

- | | | | |
|---|------|----------|--------------|
| Program | 0062 | 01/24/05 | 3164-01-2005 |
| (1) The city shall assess a capital recovery fee for water and sewer in association with new development and construction. If modification of an existing unit increases the potential for use of water and sewer services, a fee shall be assessed. The fee shall be calculated by the living unit equivalent method (or LUE) in which water and sewer usage is determined by a factor relative to one single-family residence. The capital recovery fee for water and sewer shall be per the schedule shown below. The following guideline has been established to provide a standard for the capital recovery fee determination. | | | |
| (2) The meter equivalence shall be determined by the size of the required water meter at the city's delivery point with the exception of residential occupancies (excluding multi-family) installing a 13D type of fire sprinkler system. | | | |
| (3) The meter equivalence shall be determined by the size of the required water meter at the city's delivery point for residential occupancies (excluding multi-family) except, where a 13D type fire sprinkler system is installed, fees shall be based on the meter size required excluding the fire sprinkler system (i.e., a 3/4" meter required without a fire sprinkler system vs. a 1" meter requirement when a fire sprinkler system is installed would only be charged for the 3/4" meter). | | | |
