

## RABIES VACCINATION REQUIREMENTS

- All dogs, cats, and ferrets that are 4 or more months old are required to be currently vaccinated against rabies. All rabies vaccinations must be given by or under the direct supervision of a licensed veterinarian.
- The initial (very first) rabies vaccination your dog, cat, or ferret receives is valid for 1 year, regardless of the age of the animal at the time the vaccination is received and regardless of the type of rabies vaccine used.
- The rabies vaccination your dog, cat, or ferret receives after their initial rabies vaccination is valid for:
  - 1 year if your veterinarian uses a 1-year rabies vaccine.
  - OR
  - 3 years if your veterinarian uses a 3-year rabies vaccine.
